Design barchart
- left margin bigger to accommodate for axis value "Temperature"
- ticks added (default value) on y-axis
- length y-axis is highest temp value from dataset
- temp value corrected to Celsius when reading json
- y-axis label rotated and set to end at the top of the axis.
- label moved to the left of the axis
- navy blue bars, html safe font Georgia, basic axis line
- bars turn red when hovered over
- d3 script loaded from d3js site
